Mr. L. L. Long March 11, 1970

J. E. Wickham

Pack Moisture - Winston 85

The oven volatile content of Winston 85 cigarettes is not different between Winston 85 with or without puffed tobacco. The samples were obtained from the February 1970 national survey and consisted of January manufactured cigarettes. One pack of cigarettes was taken from each of 19 cartons of Winston 85 with and without puffed tobacco. The samples were not equilibrated prior to analysis.

	Puffed	Regular
Oven Volatile Content, %	11.2	11.2
Standard Deviation, %	0.3	0.5
Range, %	10.7-11.7	10.3-11.8
Number of Replicates	19	19
